

## CHEMISTRY

### Year 10 research task 1

A new island on the world map was named “Warming Island” in 2007. Your job is to research this island and produce an A4 sheet of findings. In your report you must answer the following questions.

- Where is the island?
- How is it new to the world map?
- What process explains this?
- Are there likely to be any other new islands and where may they be?

Copy and paste is **NOT** acceptable. Your work will be judged on accuracy, presentation and how well you answer the questions. Pictures should take up no more than 30% of your presentation.
