

CHEMISTRY

Complete research task – see below, and link to specification (C2 - found on WJEC website)

Year 11 Water Research Task

Your job is to research the following

- John Snow.
- The London Cholera outbreak of 1849.
- How this led to our modern water and sewage systems.

You need to produce an A4 sheet with your research including any pictures. The quality of your work will be judged on the relevance and accuracy of what you print, pictures should occupy no more than 30% of the page! Copy and paste is NOT acceptable so write up your research using your words.
