

Our World changing

Year 9 Investigation

The two images are linked.

You are to carry out an investigation to find the link. Research and find as much information as possible and produce a brochure including the following details:

- How are the two images linked?
- What is causing the problem?
- What can be done to prevent the problem?
- What happens if numbers of a species decline?
- What is the impact on a local and global scale?

Use this as a research opportunity to consider mans effects on the environment. Do not copy and paste, rather read information and produce the brochure in your own words.

You must include references to any books, websites or other sources used in you research.
